Now, after receiving $18 billion in government loans and engaging in its largest lobbying campaign ever, the Big Three must simply get through to the end of this week without having to admit to Congress and the American people that they will no longer be profitable and that there will be layoffs and plant closings. While the Obama administration has kept its hands off GM and Chrysler, it has been quite active in terms of bailouts for the banks and the auto loan servicers, and it has been very active with the auto industry in terms of negotiating with it and giving it billions of dollars in loans. Unfortunately, GM and Chrysler were rescued by the American people who were duped by the Obama administration into thinking that the government would protect their jobs and their investment in the companies. After all, these were companies that represented the best in American manufacturing and were known for providing jobs and good-paying jobs to hundreds of thousands of Americans. Instead, the Obama administration dumped two of the companies into the government's lap, and then allowed them to teeter on the brink of bankruptcy and eventual collapse. When GM came to Congress for a bailout, Obama said that he would veto any bill that would have forced GM to restructure and recapitalize. However, the administration also said that it would provide the company with a bridge loan of $50 billion.
